

ZSK **SPRINT 7L** EMBROIDERY SOLUTION

The Thinnest Tubular Arm of the
Embroidery Industry

Source of Digital Solutions...

Digital Star Qatar has been leading the digital scene in Doha for over 10 years, as suppliers and distributors of signage, advertising and LED solutions. Our commitment to providing the best quality machinery and top-notch technology from around the world has enabled us to set new and improved standards in sign and digital printing industries. DSQ has developed into a true trendsetter and a reliable destination for customers seeking exhaustive custom and wholesale solutions. From sign makers, digital print houses, POS/POP makers, retail fit-out companies, to exhibition stand builders, construction companies and glass and aluminum fabricators industries, we promise to take your business to unprecedented levels

SPRINT 7L EMBROIDERY SOLUTION

CONTENTS

 **P3-6** PRODUCT OVERVIEW

 **P7-8** PRODUCT SPECIFICATION

 **P9-10** TERMS AND CONDITIONS

PRODUCT OVERVIEW

The series is equipped with the thinnest tubular arm of the embroidery industry. It enables orders that could not previously be processed, eg shirt pockets or shoes. The machines embroider without "picker" on the front. Your advantage: textiles can no longer get caught in the hook and thus remain undamaged. Rely on quality production with the smallest clearances on the tubular arm.

VARIOUS APPLICATION AND EXPANSION OPTIONS FOR ALL REQUIREMENTS AND AREAS.

The SPRINT Series includes all features of an industrial embroidery machine that makes it the most advanced compact embroidery machine in the market.

The SPRINT was the first machine at ZSK to be equipped with the slimmest tubular arm in the industry. Due to this feature, the machine is capable to embroider shirt and trousers pockets. The slim tubular arm sets the benchmark for the industry.

Operation without a picker avoids textiles being damaged from the picker pulling fabric into the hook.

The machine is available for tubular, cap & border frame embroidery with a maximum speed of 1200 stitches per minute. The strength of the industrial design & the precision of the components used allow the SPRINT to be your ideal solution for embroidery on shoes, leather products or even car mats.

Being equipped with the T8-2 controller, the SPRINT Series is ideal for workflow solutions.

With the embroidery machines of the SPRINT series, in addition to the best embroidery quality, we offer many additional devices and frames that support you in the development and implementation of your creative ideas and make the requests of your customers an economic success for you.

MAIN FEATURES

- Single head
- 18 needles/colours
- Embroidery speed 1,200 stitches/min.
- Embroidery width up to 600mm
- Automatic thread cutter
- Smallest tubular arm of industrial embroidery
- Upper and lower thread guard
- Automatic reverse embroidery function
- Height-adjustable fabric presser
- Contouring with lowered needle
- Low noise and low weight
- T8-2 control unit

- Intuitive and logical user guidance
- Ready for networking
- Accepts all common industrial embroidery codes
- Can be operated in 14 languages
- Storage for up to 80 million stitches
- Barcode capability

PRODUCT OUTPUT

FLAT EMBROIDERY

Flat embroidery with border frame meets the highest demands in all application areas. Flat stitch offers almost endless possibilities to optimally present your motif.

CAP

The cap extension allows you to efficiently implement your ideas in the capstick area and thus the production of individual caps in small series.

SHOES

Embroidering a sports shoe with its name, the name of your favourite team or your favourite player makes it a unique and very personal object.

NAME BADGES

With the help of the stencil template frame, name badges can be created efficiently, through simple handling and with little effort with different or even the same names.

SHIRT POCKETS

The embroidery of shirt pockets with personal initials, a company logo or fashionable application individualizes the garment and is an expression of personality or corporate identity.

TUBULAR

Embroider on most standard garments and textiles with the Premium Allied Grid-Lock plastic tubular frames, available in various sizes.

HOOPMASTER MAGNETIC

Flat embroidery with border frame meets the highest demands in all application areas. Flat stitch offers almost endless possibilities to optimally present your motif.

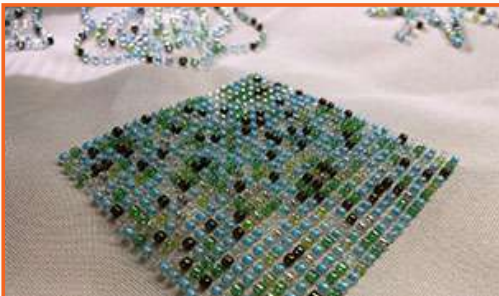

CYLINDER

The cap extension allows you to efficiently implement your ideas in the capstick area and thus the production of individual caps in small series.

SEQUINS

Embroidering a sports shoe with its name, the name of your favourite team or your favourite player makes it a unique and very personal object.

BEADS/PEARLS

With the help of the stencil template frame, name badges can be created efficiently, through simple handling and with little effort with different or even the same names.

CORDING

The embroidery of shirt pockets with personal initials, a company logo or fashionable application individualizes the garment and is an expression of personality or corporate identity.

BORING

Embroider on most standard garments and textiles with the Premium Allied Grid-Lock plastic tubular frames, available in various sizes.
