UNBEATABLE PRINT AND CUT WORKFLOW

Combine the JV100-160 with a Mimaki cutting plotter for unbeatable print and cut productivity. Mimaki's latest cutting plotters feature the new ID Cut function, which enables printer operators to con-

tour cut multiple jobs with minimal intervention, even for jobs longer than 2 metres. Offering trouble-free, automatic cutting of consecutive jobs, the ID cut function saves time and reduces potential material waste.

NEWLY DEVELOPED ECO-SOLVENT INKS

In addition to Mimaki's popular SS21 and BS4 inks, the JV100-160 features two new fast drying eco-solvent inks.

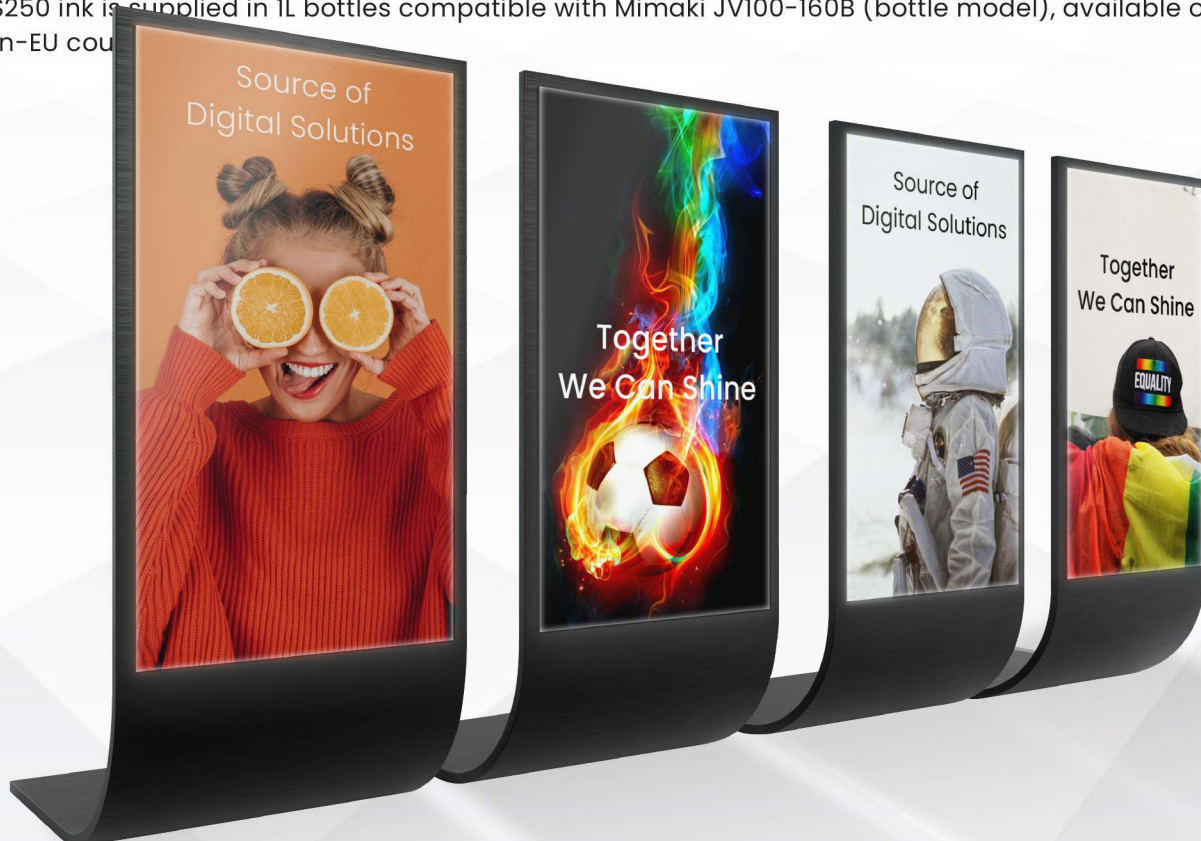

AS5 Ink

Available in 8 colours, including Light Black and Orange, the AS5 ink significantly improves the colour gamut, covering approx. 94.8% of the PANTONE coated colour chart. The 8-colour configuration also allows you the lowest running costs in the market today. The AS5 ink is delivered in 600ml and 2L ink packs

CS250 Ink ^(*1)

Offered at a highly competitive price, even compared to that of third-party inks, the CS250 eco-solvent ink is delivered in 1L ink bottles to ensure longer print operation.

*1: CS250 ink is supplied in 1L bottles compatible with Mimaki JV100-160B (bottle model), available only in non-EU countries

SUSTAINABLE CHOICES THAT LOWER YOUR RUNNING COSTS

All Mimaki JV100-160 compatible inks are all GREENGUARD GOLD certified. Products that are GREENGUARD GOLD certified meet the rigorous standards for low emission of volatile organic compounds (VOCs) and ensure that a product is acceptable for use in environments such as schools and healthcare facilities

GREENGUARD

MIMAKI'S UNIQUE CORE TECHNOLOGIES ENSURE

UNATTENDED, CONTINUOUS PRINTING OPERATION COMBINED WITH THE VERY HIGHEST IMAGE QUALITY

STABLE PRODUCTION

NCU
Nozzle Check Unit automatically checks nozzles and cleans them if required.

NRS
Nozzle Recovery System automatically substitutes defective nozzles giving uninterrupted operation.

INTELLIGENT HEATERS
3-way intelligent heaters improve media and ink performance. Pre- and print-heaters optimise ink adhesion. Post-heaters accelerate drying.

HIGH IMAGE QUALITY

MAPS4
Mimaki Advanced Pass System reduces banding by dispersing ink drops between passes.

WFC
Waveform Control utilises finely tuned frequencies to precisely shape and place individual ink drops.

VARIABLE DOT
enables the printer to print in 3 different dot sizes to create high quality images with smooth gradations.

ADVANCED RIP SOFTWARE

The JV100-160 comes with Mimaki's user-friendly RIP software, Rasterlink 7, as standard, featuring:

1. New HARLEQUIN RIP core for more accurate handling of PDF files with shadows and transparencies.
2. Up to 25% faster processing of complex PDF files.
3. Variable data printing to easily create a series of prints with dynamic variations of texts and photos.
4. Improved user interface and screen efficiency

Raster Link 7

Offered at an entry-level price, the JV100-160 delivers the best print performance at the lowest running costs compared to other solvent printers in the sign printing market. Mimaki's proven technology featured in this new printer advances ease of use, and with the possibility to load 8 different colours, high definition colour reproduction comes standard.

NEW DOT ADJUSTMENT SYSTEM (DAS)

Introducing Mimaki's easy-to-operate Dot Adjustment System (DAS), which automatically performs bi-directional and media feed adjustments. This eliminates the need for manual adjustments, saving time & improving overall productivity.

With DAS

* DAS may not be compatible with some media such as coloured, transparent, and embossed substrates.

Incorrect bi-directional drop landing position

Overlap / black streaks (Insufficient paper feeding)

Gap / white streaks (Excessive paper feeding)

High productivity supported by high functionality allows for more order processing of short-duration work.

*JV100-160: 20.0m²/h JV150-160: 11.1m²/h (Media: PVC, Y resolution: 720dpi 6P)
