

FIBER LASER CUTTING MACHINE

Unleash Precision and Power

MXL-3015(3000W)

DIGITAL STAR QATAR دیجیتال ستار قطر

Source of Digital Solutions...

Welcome to Digital Star, your trusted partner in the world of cutting-edge printing solutions. As a leading printing machines, materials, and ink authorized dealer in Doha - The State of Qatar, we pride ourselves on delivering state-of-the-art technology that empowers to achieve unparalleled levels of efficiency and quality.

At Digital Star, we understand the pivotal role that printing machinery plays in the success of your operations. With a commitment to innovation and excellence, we curate a diverse range of top-tier printing machines to meet the unique needs of our clients. Our product line-up reflects the latest advancements in the industry.

As a responsible printing machines supplier, we prioritize sustainability. Our commitment to eco-friendly practices is reflected in the products we offer, promoting energy efficiency and environmentally conscious manufacturing processes. When you choose Digital Star, you're not just investing in cutting-edge technology – you're partnering with a company that values the planet as much as your success.

About Us

MXL-3015(3000W)

PRODUCT OVERVIEW

• This machine is specially developed for cutting metal sheets. The advantages of this machine are resonable price, high cost performance and reliable performance.

Application materials:

• The fiber laser cutting equipment is suitable for cutting various metal sheets, such as carbon steel sheet, iron sheet, stainless steel sheet, low carbon steel sheet, alloy steel sheet, spring steel sheet, galvanized iron sheet, aluminum sheet, copper sheet, brass sheet, bronze sheet, gold sheet, silver plate, titanium plate, etc.

Application Industries:

• The Fiber Laser Cutting Machines are widely used in manufacturing sheet metal processing, metals components and parts, ironware, chassis, racks & cabinets processing, metal crafts, metal art ware, elevator panel cutting, hardware, auto parts, billboard, advertising, signs, signage, metal letters, LED letters, kitchen ware, advertising letters, glasses frame, electronic parts, nameplates, refrigeration machinery, agricultural machinery, food machinery, kitchen stainless steel countertops, aerospace, railroad locomotive, auto parts manufacturing, car body processing, medical equipment, smart home, home appliances, kitchen equipment, fitness equipment, machinery manufacturing, sheet metal processing. etc.

Heavy duty pipe and steel plate welded machine frame

Our machine frame is welded by heavy duty steel plate. And we have the aging vibration process, annealed process. So the machine will not get deformed for long time use.

Here is the process of how we make our machine frame:

Using the thick steel plate to weld the machine frame \rightarrow Annealing process \rightarrow Rough machining \rightarrow Vibratory Stress Relief \rightarrow Fine machining

1. The steel plate we use for welding the machine frame very thick, so machine frame will allow the machine bear heavy material.

2. The Annealing proces : Annealing is a metal heat treatment process in which the metal is slowly heated to a certain temperature for a sufficient period of time and then cooled at a suitable rate. It is for improve or eliminate various structural defects and residual stresses caused by steel during casting, forging, rolling and welding to prevent deformation and cracking of the frame.

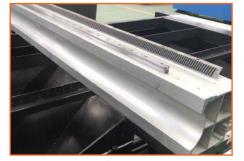

3. Vibration aging treatment is a commonly used method for eliminating internal residual internal stress of engineering materials. It is caused by vibration, so that the vector sum of residual internal stress and additional vibration stress inside the workpiece exceeds the yield strength of the material. The plastic deformation causes the internal stress inside the material to relax and reduce.

From the process that we make the machine frame, you can see we do all the necessary processes to avoid deformation of the bed and make the machine shock resistant

Heavy duty pipe and steel plate welded machine frame

It has the advantages of high electro-optical conversion efficiency, good beam quality, high energy density, wide modulation frequency, strong reliability, long life, and maintenance-free operation

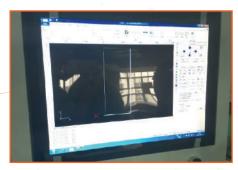

Aluminum Profile Gantry Beam

The gantry beam is aerospace standard manufacturing, strongest strength (6061 T6); The gantry beam is with high impact resistance performance and lig

The gantry beam is with high impact resistance performance and light weight, best for high-speed movement.

Raytools Laser Head

RayTools AG designs and produces laser beam delivery systems, commonly called beam tools or processing heads. RayTools processing heads have built-in intelligence, incorporating real-time sensing, feedback control loop, and adjustment capabilities. RayTools has grown to be one of the largest beam tool suppliers in the world.

Height Controller – BCS100 V3.0

• BCS100 capacitive height controller is a high-performance control device which uses closed-loop control method.

- Adapt to any cutting head and nozzle.
- Support alarm while hitting the board and beyond theedge.
- Support leapfrogs and segmented piercing.
- Support functions to detect the head height in realtime.

Functional possibility

- Supports flying cutting, frog jumping, electric focusing, double exchange workbench.
- Supports two levels of perforation
- Support communication control of most mainstream lasers in the market

Control

- Support track accuracy 0.05mm, positioning accuracy 0.01mm.
- Maximum cutting speed 100m / min, maximum moving speed 100m / min.
- Suport Maximum acceleration 1G

Japan Fuji servo motor is top brand in all over the world. Fuji servo motor is installed on XYZ axis.

The big powerful servo motor on Y axis, makes the machine cutting at high speed, the Max. speed can be 80m/min. Moreover, the Juji servo motor is famous for the high precision and stable performance.

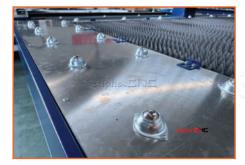

Japan Shimpo G Japan Shimpo gear

Japan Shimpo Gear Reducer

Japan Shimpo gear reducer is with high transmission efficiency, low energy consumption and superior performance. Service life is much longer.

Taiwan TBI ball screw on Z axis

As the top brand of the ball screw, TBI ballscrew is famous for the high precision, and long service life.

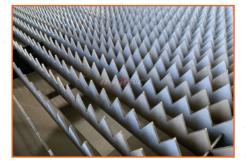

Feeding roll

The machine comes with the feeding roll. The feeding roll will help the worker feeds the material easily

Electrical Proportional Valve

It can realize the endless adjustment of pressure and speed, and avoid the impact phenomenon when the normal switching valve changes direction

Serrate working platform

The steel serrated table can withstand heavier work pieces and has only a small area to touch the workpiece when cutting, maximizing the melting of the table surface by the heat of the laser. Each piece is independent for easy replacement and maintenance.

MXL-3015(3000W)

USB Data interface

There are three USB data ports, which can be easily inserted U disk and read files.

Rotatable monitor support frame

The monitor is fixed on a rotatable support frame, which is convenient for the staff to adjust the angle according to their needs.

Big Independ Control Cabinet

Control panels, drivers, and other low voltage components are installed in the control cabinet. Larger space helps to place and dissipate electrical components. It can prevent interference to the greatest extent.

Automatic lubrication system

The function of the automatic oil pump is mainly to perform regular quantitative oiling on the easily wearable guide rail, ballscrew and the rack gear. It is by the digital controller to control the lubrication pump working cycle; lubrication time and intermittent time.

Water Chiller

The function of the water cooler is to reduce the temperature of the laser generator and prevent the laser from being burned out. We only use brand-name water coolers with reliable quality.

Exhaust Fan

The main function of the fan is to remove the smoke from the cutting, to ensure that the workshop air is clean, and to prevent the smoke from contaminating the lens.

Air conditioner

There are three USB data ports, which can be easily inserted U disk and read files.

FIBER LASER

MXL-3015(3000W)

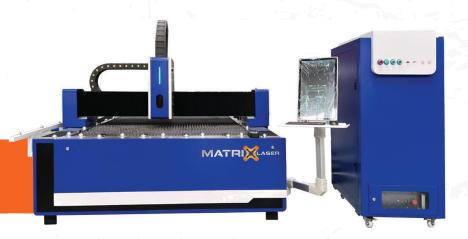

TTING MACHINE

XY AixsTaiwan Hiwin Guide Rail& Taiwan YYC helical rack & pinion

Extremely high load capacity in 4 main bearing directions. High torque carrying capacity Optimized roller circulation system and guide element design for smooth, quiet operation Standard end seal. Optimized lubrication channel design minimizes lubricant consumption

Lubricated interface on all sides for easy maintenance. Integrated induction, wear-free measuring system with a maximum measuring

length of 4m and a resolution of less than 1µm Hiwin guide system allows you to move the heaviest loads with minimal force while ensuring the design rigidity and precision required by high performance machine and robot users. A variety of precision roller guide systems are available. XY AixsTaiwan Hiwin Guide Rail& Taiwan YYC helical rack and pinion The rack and pinion on XY axis is from Taiwan YYC or German Vastun. The high hardness of the material makes the rack more wear resistant.

Optional Items

Air compressor + freeze dryer + filter

1. The special air compressor for laser cutting adopts an integrated design, which is simple and convenient to install.

2. Adopt well-known brand freeze dryer to make the freeze drying effect better.

3. The filter adopts imported filter element five-stage filtration to purify the air and improve the air quality.

4. Adopt large main engine and super large oil separation barrel design, complete oil separation, low oil content, customized laser special oil content, oil content is less than 1ppm.

5. Quiet design stainless steel tube to ensure no leakage.

Stabilizer

The function of the voltage stabilizer is to stabilize the power supply voltage that fluctuates greatly and does not meet the requirements of electrical equipment within its set value range, so that the light cutting machine can work normally under the rated working voltage. For countries and regions with unstable voltage, it is recommended that customers choose this device.

Four filter cartridge dust collector

1. The filter area is increased by 3 to 5 times, and the filter wind speed is greatly reduced

- 2. The dust removal efficiency is increased to 99.99%
- 3. The length of the filter cartridge is short, and there is a large excess
- space, which is conducive to dust settlement
- 4. Extend the life of the filter cartridge

5. The filter element is short and few, easy to install (top mounted), easy to repair and replace

Note: The red-label parameters in the table are proofing parameters, which are greatly affected by various factors in actual processing. They are only suitable for small-batch production and are not recommended for large-scale production. It is recommended to use a higher-power laser.

PRODUCT SPECIFICATION

| Model | MXL-3015(3000W) |
|------------------------------------|--------------------------------|
| Working Area | 3000*1500mm |
| X axis working area | 3,000mm |
| Y axis working area | 1,500mm |
| Laser Power | Raycus 3,000W/ Max 3000W |
| Positioning accuracy | ±0.03mm |
| Repeatability positioning accuracy | ±0.02mm |
| XY Axis Maximum Acceleration | 0.5-0.8g |
| XY Axis Max. speed | 80m/min |
| Working Table | Serrate working platform |
| XY Axis Transmission system | German helical rack and pinion |
| Z axis Transmission system | Taiwan TBI ballscrew |
| Cooling System | Industry water chiller |
| Power Supply Rated Voltage | 3-phase 380V/50Hz |
| Machine Weight | 2500KG |
| Dimension | 4600*2250*1900mm |
| Chiller Unit | S&A or Hanli Water Chiller |
| Dust Unit | Extraction Pump |

*Specification are subject to change without prior notice, all rights reserved.

SYSTEM REQUIREMENTS (PC's)

Refer to the appropriate section below for the minimum and recommended computer system requirements necessary to use this machine.

| Operating System* | Windows 10 (64 Bit) or Later |
|-------------------------|--|
| Processor | i7 - 2.6 GHz or faster |
| Memory (RAM) | Min. 8GB |
| Video Card and Monitor | 1280x1024 or Higher Resolution |
| Working Hard Disk Space | 1 TB SSD or more recommended |
| Graphics Card | 2GB or more (Optional) |
| Optical drive | DVD-ROM |
| Other requirements | Ethernet connection for network capable printers |
| | Available USB ports |
| Recommended Brand | Lenovo / Dell |
| | |

* Note: You can use a laptop or desktop computer

* Use the original operating system and software. If you are using pirated operating system or software, we are not responsible for any damage to Machine workings, and also the warranty terms will become void.

POWER REQUIREMENTS

| Voltage Regulator | 8000W Stabilizer | |
|--------------------|-----------------------|--|
| | and the second second | |
| OTHER REQUIREMENTS | | |

| OTH | IER | REQ | UIRE | MEN | ITS |
|-----|-----|-----|------|-----|-----|
| | | | | | |

| Coolant | Min. 10L Distilled Water (For Chiller) |
|---------|--|
|---------|--|

Terms and Conditions

- 1. Payment to be made in QR currency.
- 2. Payment Terms: As mentioned in Quotation.
- 3. Bank Details:

| Bank Name | Branch | Beneficiary Name | Acc # | Swift Code | | |
|------------------------------------|-----------------|--------------------|---------------|-------------|--|--|
| Qatar Islamic Bank | Al Khour Branch | Digital Star Qatar | 0111453200015 | QISB - QAQA | | |
| IBAN: QA16QISB00000000111453200015 | | | | | | |

- 4. Bank Charges: Any bank charges relevant to the above transactions will be to your account.
- 5. Any charges, duties, taxes or levies at the ports of entry will be to our account.
- 6. The charges of loading, boarding and local conveyance of the technician will be to our account.
- 7. Any required electrical, mechanical and civil site preparation should be done by the customer according to our engineer's requirements.
- 8. Digital Star Qatar will not be held responsible for delays caused by any damage in the equipment due to shipment, unloading accidents and any related reasons, which is beyond our control.
- 9. The warranty will be 12 months from the date of installation from Digital Star Qatar. Wear and tear, consumables are exempted and warranty can be claimed only if you use Services from Digital Star Qatar.
- 10. Service will be free of cost within 12 months from the date of installation.
- 11. Any claim will be invoice directly to you then we will send for claiming procedure which will take 45-60 days, if the claim got approved credit note will issued directly.
- 12. Delivery: As mentioned in quotation
